

GoSafe Site Selection - 20mph

GoSafe and Welsh Police forces will support the new national 20mph speed limit. Along with other partners such as Welsh Fire and Rescue Services, Local Authorities and Community SpeedWatch groups, we are engaging with motorists and communities, to ensure the new speed limit is respected.

Enforcement will take place where it is needed to keep roads and communities safe, and will be carried out through a combination of mobile enforcement vehicles and fixed cameras, as is the case now.

*Roadside engagement will be delivered using 'Operation Ugain'. These operations use speed monitoring equipment to identify people travelling over the speed limit, before stopping the vehicle and giving the driver a choice between a fine and points or roadside engagement. The most dangerous drivers will not be eligible and will be prosecuted.

These operations are delivered by GoSafe, Welsh Fire and Rescue Services, Local Authorities and Welsh police forces.
